

CHAFE PROTECTION FOR LIFELINE AND STANCHION POLE

Leather cover has been the natural material for centuries to protect the sail from chafe. Each pack contains two prepunched leather protections, two needles and waxed polyester thread together with instructions how to easily sew the covers. With pre-punched holes in the leather cover, the sewing is done in a few minutes. The covers can be reused and sewn back again after, for example, if the lifeline is removed during winter storage. See how to sew the leather covers on Youtube www.youtube.com/waterlinedesign. Available in three sizes.

- 3 sizes
 - Lifeline, pressed wire (art 1150)
 - Lifeline, parafil line (art 1151)
 - Stanchion pole (art 1155)
- Easy to mount
- Easy to fit and refit again

2 needles included in every package
