Reg. nr. 23.153

CVR-nr. 22 16 25 19

A **Moonlight** flyscreen is available for all offshore and lowline deck hatches series 55 and 62 mounted with trim (inner frame).

The flyscreen kit is delivered complete with screen, retainers, and fasteners. When not in use the screen can easily be stored under the bunk.

Mounting

Make a pencil mark for 4 holes (8 holes for 62 x 62) as described on the reverse. Drill the holes through the trim and into the deck to a depth of approx. 17 mm. Make sure beforehand that the deck will accept this depth, otherwise a shorter fastener has to be used.

The fasteners supplied with the kit are 25 x 4.2 mm, and a drill of 3.2 mm has to be used.
